Frequently Asked Questions

Q. Why aren't my medications filled ahead of me checking in?

- A. Due to patient safety, we require that every patient seen by a 42 MDG provider check in with a pharmacy technician following their appointment or phone consult. This step is to ensure our patients are receiving the correct medication and dosing along with verifying patient's allergies.

Q. Why are patients not able to pick up their refilled prescriptions at the drive thru at Maxwell Clinic?

- A. This is a security and safety issue for the base. If the pharmacy allowed refill pickups at the window, the traffic flow on the adjacent road would be backed up and make traveling down this road very dangerous. We must ensure that the road remains clear for emergency response teams. However, the pharmacy does extend this service to our disabled patrons because we understand that the distance may be difficult.

TRICARE Mail Order Pharmacy:
